SHIVAM KESHARI

Full-Stack Developer & Applied AI Systems Builder

Prayagraj, UP, India | shivamkeshari1510@gmail.com | github.com/S1h2i3v4a | linkedin.com/in/shivam15keshari

EDUCATION

United Institute of Technology, Prayagraj 2023 - 2027

Bachelor of Technology in Computer Science & Engineering (Final Year / Class of 2027)

TECHNICAL SKILLS

Languages: Java (300+ Solved DSA Problems, OOP), Python, JavaScript (ES6+), TypeScript, SQL
Web & Backend: Next.js (App Router), React.js, Node.js, Express.js, MongoDB (Aggregations), REST APIs
AI & Computer Vision: OpenCV (Morphological Filters, CLAHE, Otsu), EfficientNet-B0, CNNs, Scikit-Learn
Developer Tools: Git, GitHub, Tailwind CSS v4, Three.js WebGL, Vercel, Render

RESEARCH & PUBLICATIONS

Skin Disease Classification and Severity Stage Identification SocProS 2026 Submission

- Engineered an OpenCV preprocessing pipeline applying morphological black-hat filtering and CLAHE.
- Segmented dermatological lesions via adaptive Otsu ROI masking for noise-resistant feature extraction.
- Evaluated transfer learning on EfficientNet-B0 with multi-class diagnostic staging on benchmark PH2 dataset.
- Achieved 94.2% test-split classification accuracy and 96.15% precision on PH2 benchmark dataset.

ENGINEERING PROJECTS

Full-Stack Financial Expense Platform (MERN) 2025

- Architected REST API backend with Express.js and MongoDB aggregation pipelines ($match, $group).
- Designed responsive React dashboard with monthly burn-rate calculations and category budget delta alerts.
- Implemented JWT bearer authentication and role-based data isolation.

Celebration & Event Planner Web Application 2025

- Built a centralized event coordination interface with interactive milestone status timelines in React.
- Engineered vendor allocation matrix and real-time budget reconciliation ledger.

Dynamic Mock API Generator & Weather Telemetry Client 2025 - 2026

- Developed configurable JSON schema generator and live HTTP error boundary simulator (200, 429, 500).
- Created responsive telemetry client fetching meteorological observations across multiple stations.

ACHIEVEMENTS & HACKATHONS

- Solved 300+ DSA problems in Java following Striver A2Z sheet across LeetCode and GeeksforGeeks.
- Smart India Hackathon (SIH Internal): Developed automated administrative and tracking workflows.
- Eurogrip Hackathon: Built data analytics prototypes under timed competitive constraints.
- Portfolio Design Hackathon 2026 (Skillinf): Built award-winning cinematic 3D Next.js engineering portfolio.
